1. INSTALLATION :

1.Automatic: use OpenIV to install the OIV package. Strongly recommend using 'mods' folder; will delete DamageEngine.asi and DamageEngine.ini

2.Manual (If you wish to know in details which files I've altered): Extract the .oiv package as .zip, then copy & replace files correspondingly. I've organized every files such that your game suffered the least amount of change, to avoid mod conflicts.

3.Optional 4 slots: copy & replace optional pickups.xml and slots.xml to root/Pickups

2. UNINSTALLATION :

1.Automatic: use OpenIV to install the OIV package. Strongly recommend using 'mods' folder; will delete Pickups.asi but keep Pickups.ini

2.Manual: Extract the .oiv package as .zip, then copy & replace files correspondingly.
